Take your bike security to

new limits

MetaSystem and two wheels

MetaSystem S.p.A is committed to the development of motorcycle security, safety and information solutions. Over the years, a wide range of innovative motorcycle specific products have been developed by a dedicated team of technicians and commercial staff. Many years individual experience and a passion for biking are the key factors behind the success of MetaSystem's motorcycle product range.

To satisfy the broad demands for quality and specification from the global marketplace MetaSystem complies with the most stringent certifications: ISO 9001:2000, ISO 14001:2001, TS16949:2002 & AVSQ94. All MetaSystem products carry the 'e' mark and MetaSystem fulfils the most demanding insurance company specifications.

Increasingly the quality of product and production capability has meant motorcycle manufacturers are asking MetaSystem to become involved in their accessory line programmes. Working closely with manufacturers' R&D teams, MetaSystem creates bespoke system solutions to meet their customers' exacting requirements.

Many top motorcycle manufacturers are also specifying MetaSystem products as original equipment. In 2003 more than 40% of total motorcycle units were destined for OE Tier 1 or accessory line applications. Yamaha, Suzuki, Benelli, Aprilia and BMW are some of the companies currently specifying MetaSystem security.

MetaSystem, the World's top manufacturer of motorcycle security, safety and information solutions.
